

# FOLDING V PLOW

## FVPM 55, 61, 66, 71

This folding "V" plow lets you navigate with ease around park benches, light poles, fire hydrants, and other obstacles. Carbide cutting edges and adjustable skid shoes reduce wear and extend component life. Scoop, push, and pile snow thanks to the seven possible blade positions that require only two hydraulic circuits and one case drain. Dual trip edges with coil springs and hydraulic shock absorption keep the plow stable and running smoothly over obstacles.
