

3PH SPREADER

TRP 0.4, 0.65, 1.0

TRP is a tractor-mounted spreader, available in 0.4 to 1.5 m³ and up to 500 litres of brine. Intended for tractors used in winter service, the TRP spreader is operated through the tractor's hydraulic system or with it's own dedicated system. Self-loading hopper is also an option for effortless, safe and easy loading. Robust construction and minimal maintenance requirements make TRP an industry leading addition to every tractor during the winter months. Using EPOS 5 to 30, spreading width, dosage, tracking and parameters is at the touch of your fingertips.

	TRP 0.4	TRP 0.65	TRP 1.0
Capacity	4.7 cu yd (0.4 m ³)	7.6 cu yd (0.65 m ³)	11.8 cu yd (1 m ³)
Overall Width	53" (1.3 m)	65" (1.6 m)	81" (2 m)
Overall Height	51" (1.3 m)	56" (1.4 m)	60" (1.5 m)
Overall Length	43" (1.1 m)	47" (1.2 m)	48" (1.2 m)
Spreading Width	39" - 236" (1 - 6 m)		
Ground to Hook Distance	14" - 26" (360 - 650 mm)	24" - 36" (600 - 915 mm)	
Control Unit	EPOS 1		
Mounting	3 Point-Hitch		
Options	EPOS 5 Control Unit, Self-loading mechanism, Automation sensors, GPS speed sensor, work and rotating lights, Galvanized tank, Stainless steel tank, Tarpaulin cover, Protective mesh cover
